

## Getting Started with Classroom Mode for Minecraft Education Edition

@GumbyBlockhead May 3rd, 2017.

- 1) Make sure you have the latest downloads of
  - a) Minecraft: Education Edition <https://education.minecraft.net/get-started/download/>
  - b) Classroom Mode for Education <https://education.minecraft.net/companion-app-download/>
- 2) Launch **Minecraft: Education Edition** and Login with your O365 account.

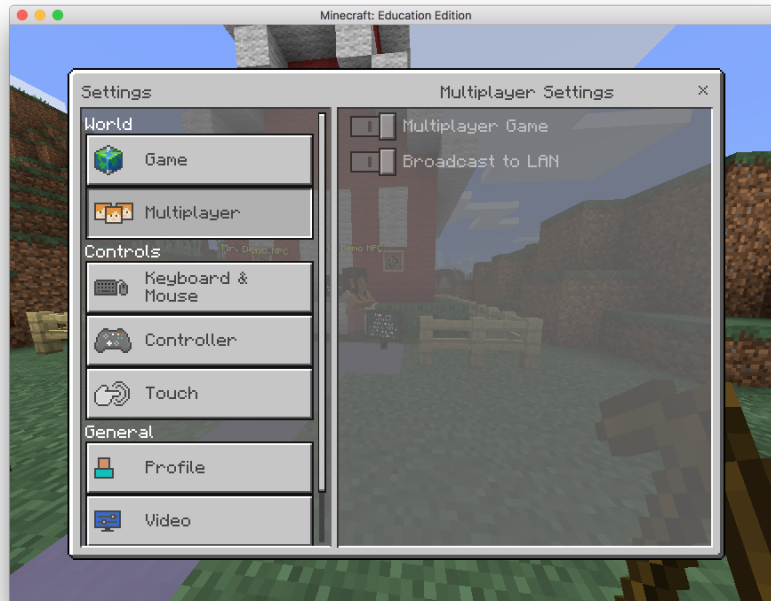

- 3) Choose a world to share. (If you do not have one, click Create New.) The world will load and you will appear in the world.

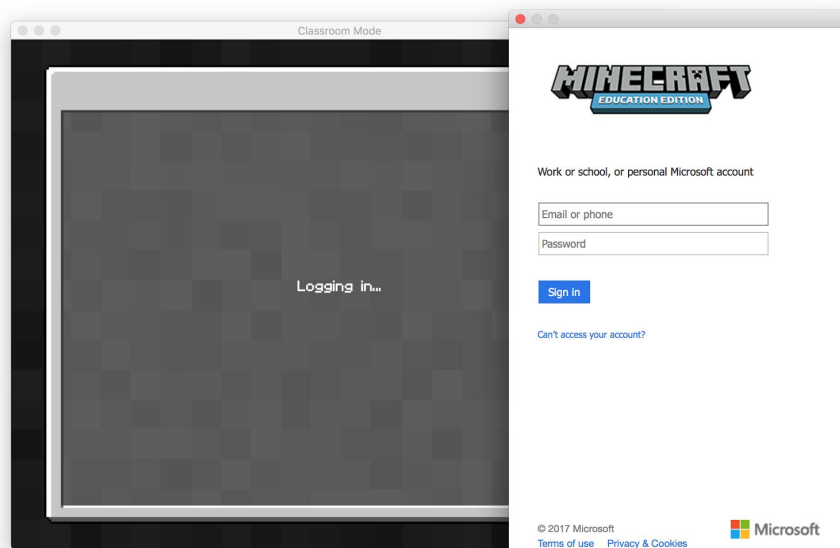

- 4) Press ESC to return to the menu, and select Settings

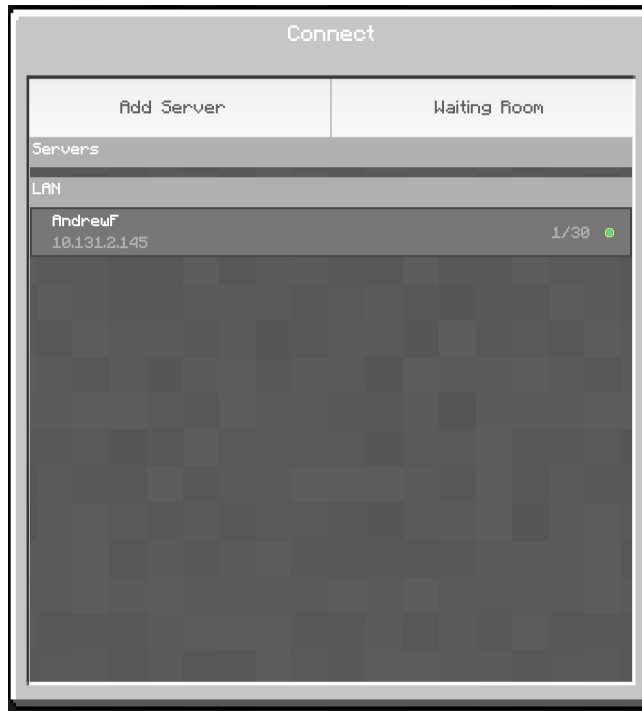

- 5) Under “World,” click Multiplayer. Ensure that both Multiplayer Game and Broadcast to LAN are on (toggled to the right)

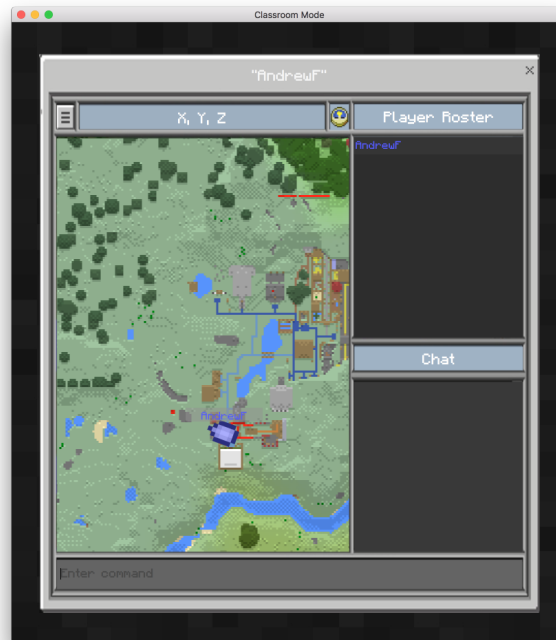

- 6) Press ESC to return to the menu, and then Resume Game.  
7) Launch **Classroom Mode for Minecraft** on the same machine (for initial testing purposes), and Login with your O365 account.

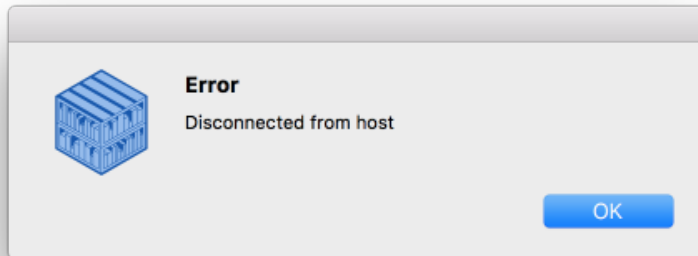

- 8) You should see a Connect dialogue, and your hosted world should be listed under LAN, displaying your username and your IP address. Click that entry to view that world in Classroom Mode.

- 9) You will then see the map of the hosted world. You should see yourself located on the map. If you move around in the Minecraft: Education Edition world. you should see your pointer moving around on the map.

If the source (host) world is closes down, you will see the following dialogue on formerly connected machines.

Note: **Classroom Mode for Minecraft** is different from the @TeacherGaming #MinecraftEDU product, which provided a server+control interface. The current Classroom Mode for Minecraft offers primarily a method by which you connect to an already hosted world, be that a teacher-hosted world, or one hosted by a student.

The [education.minecraft.net](https://education.minecraft.net) website provides two tutorials for using Classroom Mode for Minecraft.
